## RESEARCH INTERESTS

---

I am particularly interested in enabling a more reliable and efficient power grid from a computer science perspective, mainly through learning and optimization methodologies. Currently, my research topics include: 1) Developing robust and efficient algorithms to manage uncertainties in power system operations and electric vehicle charging; 2) Designing effective energy forecasting algorithms for both system-level and residential-level applications.

## EDUCATION

---

|   |  |
|---|--|
| <b>The Chinese University of Hong Kong, Shenzhen</b><br>M.Phil in Computer and Information Engineering<br><b>Advisor:</b> Prof. Chenye Wu | Sep. 2022 - Jul. 2024 (expected)<br>GPA: 3.87/4.00 |
| <b>Xidian University</b><br>B.E. in Software Engineering  | Sep. 2018 - Jun. 2022<br>GPA: 3.70/4.00            |

## SELECTED RESEARCH EXPERIENCE

---

|   |                       |
|---|-----------------------|
| <b>Joint Chance-constrained Unit Commitment with Statistical Feasibility</b><br>Supervisor: Prof. Chenye Wu | Oct. 2022 - Jun. 2023 |
|---|-----------------------|

- Extended the notion of statistical feasibility into unit commitment, a mixed-integer problem, and formulated the statistically feasible unit commitment.
- Developed sample-based uncertainty set construction algorithms, yielding less conservative solutions.
- Accelerated the solving process from a learning-to-optimize perspective and designed the optimization kernel to boost its computational efficiency further.

### **A Learning Ensemble Approach for Probabilistic Load Forecasting**

Supervisor: Prof. Chenye Wu

Jun. 2022 - Jul. 2023

- Proposed the learning ensemble framework, which can capture the optimal nonlinear combination of different single models.
- Developed the clustering-based few-shot learning methods to augment the data if data is limited.
- Demonstrated the performance guarantee of learning ensemble framework and clustering-based few-shot learning methods.

### **SELECTED HONORS**

Modern Chinese Scientists Scholarship (top 12 in Xidian University)

Jan. 2022

National Scholarship (2% in Xidian University)

Dec. 2021

### **SKILLS**

#### **Programming Languages and Frameworks**

Python, Pytorch, MATLAB

#### **Languages**

Chinese: native; English: professional working proficiency
